

THE BROOKLINE AMBULANCE

A NEW ambulance for the town of Brookline, Massachusetts, constructed according to plans prepared by the agent and the bacteriologist of the board (see engraving) has given great satisfaction. It is made as far as possible to resemble outwardly a common depot carriage to avoid unpleasant conspicuousness, but at the same time possesses every essential of the best form of ambulance. It has a rear door as well as side doors, and every modern appliance for moving safely and comfortably the sickest patient, whether child or adult, and, furthermore, is easy to disinfect. The ambulance is kept at the hospital, and when going for a patient one of the nurses usually accompanies the driver.
